

Superintendent Evaluation Public Summary

In conducting our evaluation of the Superintendent, the evaluation tool was developed to specify implementation steps to be accomplished by the Superintendent this past year. For Goals 1 through 5 of that evaluation tool, if the Superintendent met eighty percent of those steps, then he met that goal, if he fell below sixty percent he did not meet that goal, and if he fell in between he would be developing. Goal 6 of the tool was added for Directors to provide comments related to District operations and was qualitative not quantitative. For Goals 1-5, a majority of Directors found that the Superintendent met eighty percent or more of the implementation steps identified in the evaluation tool. For Goal 6, a majority of the Directors provided positive comments about the operations of the District, with each Director providing specific areas needing focus, but no consensus on those areas.
